Part I. Performance Information: Table 1

The Commodore Nauticus® variable annuity contract is issued by Annuity Investors Life Insurance Company® (AILIC). The Commodore Nauticus offers both variable and fixed investment options. The variable investment options are subaccounts of Annuity Investors® Variable Account A (Subaccounts). Each Subaccount is invested in shares of a registered investment company or a portfolio of a registered investment company (Portfolios).

Table 1 contains information about the performance of the Subaccounts. It shows how the Subaccounts have performed over time and allows a participant or beneficiary to compare them with an appropriate benchmark for the same time periods. Benchmarks do not reflect deductions for fees or expenses of the Subaccounts or Portfolios. Past performance does not guarantee how an investment option will perform in the future. An investment in a Subaccount could lose money.

Table 3 shows fee and expense information related to The Commodore Nauticus. Table 3 shows the total annual operating expenses for the Subaccounts listed in Table 1. The total annual operating expenses of a Subaccount are expenses that reduce its rate of return. Total annual operating expenses of each Subaccount include: (1) the total annual operating expenses of the underlying Portfolio; (2) a mortality and expense risk charge of **1.25%**; and (3) an administration charge of **0.00%**. The fixed investment options do not incur any annual expenses.

Information about shareholder-type fees related to The Commodore Nauticus is set out below Table 3. These fees are in addition to the total annual operating expenses of the Subaccounts. The Subaccounts, the Portfolios, and the fixed investment options do not charge any shareholder-type fees. A summary of restrictions and limitations that apply to purchase payments, allocations, transfers, withdrawals, and active trading is also set out below Table 3.

The cumulative effect of fees and expenses can substantially reduce the growth of retirement savings. Visit the Department of Labor's Web site for an example showing the long-term effect of fees and expenses at <https://www.dol.gov/sites/default/files/ebsa/about-ebsa/our-activities/resource-center/publications/a-look-at-401k-plan-fees.pdf>. Fees and expenses are only one of many factors to consider when deciding to invest in an option. Participants and beneficiaries may also want to think about whether an investment in a particular option, along with their other investments, will help them to achieve their financial goals.

Part III. Annuity Information: Table 4

Table 4 focuses on The Commodore Nauticus annuity contract. Annuities are insurance contracts that allow the participant or beneficiary to receive a guaranteed stream of payment at regular intervals, usually beginning when the participant retires and lasting for his/her entire life or a fixed period he/she selects. Annuities are issued by insurance companies. Guarantees of an insurance company are subject to its long-term financial strength and claims-paying ability.

Additional Information Available on the Great American Insurance Annuity Group Website

The Commodore Nauticus prospectus includes information about: (1) its objectives or goals; (2) fees that will reduce account values; (3) guaranteed income payments, including any limitations on the right of participants or beneficiaries to receive such payments; (4) costs and / or factors taken into account in determining the price of benefits under the guaranteed income payments; and (5) contract limitations on the ability of participants or beneficiaries to withdraw or transfer amounts and fees or charges applicable to such withdrawals or transfer. TABLE 4	Annuity Options
Name	The Commodore Nauticus Variable Annuity Contract (The Commodore Nauticus) The interests of individual participants under a contract are evidenced by certificates of participation. In this table, "you" and "your" refer to an individual participant or beneficiary.
Issuer	Annuity Investors Life Insurance Company (AILIC)
Objective/Goal	The contract is a group deferred variable annuity. The contract is designed to be a long-term investment, to meet retirement and other long-range goals.
Benefits	<p><u>Annuity Benefit.</u> The contract will provide a guaranteed stream of annuity benefit payments to you at some future date. These payments will be based on your account value, which will depend on the performance of the investment options that you choose. The annuity benefit amount will be reduced by any fees and charges under the contract, any applicable premium tax or other tax not previously deducted, and by the outstanding balance of any loans.</p> <p><u>Death Benefit.</u> The contract includes a death benefit payable to your beneficiary if you die during the accumulation period. The death benefit will be based on the greatest of (1) your account value on the death benefit valuation date; (2) your purchase payments, less partial withdrawals and related CDSC; or (3) the largest account value on any certificate anniversary that is an exact multiple of five and occurs prior to death or your 75th birthday, if earlier, less partial withdrawals and related CDSC. The death benefit amount will be reduced by any fees and charges under the contract, any applicable premium tax or other tax not previously deducted, and by the outstanding balance of any loans.</p> <p><u>Settlement Options.</u> AILIC will make periodic payments in any form of settlement option acceptable to it at the time of an election. The standard forms of settlement options are listed below.</p> <ul style="list-style-type: none"> • Payments for as long as you live and, if you select a fixed period and you die during the fixed period, payments for the rest of the period. • Payments for as long as you live and, if the secondary annuitant you designate survives you, 50% of the payment amount for as long as the secondary annuitant lives. • Payments for as long as you live. • Payments for a fixed period you select. <p>The dollar amount of benefit payments will vary with the frequency of the payment interval and the duration of payments. Benefit payments may be calculated and paid as a variable dollar benefit, as a fixed dollar benefit, or as a combination of both.</p>

TABLE 4	Annuity Options (continued)																		
Pricing Factors	<p>The cost of your right to receive annuity benefit payments and the cost of the death benefit are included in mortality and expense risk charge of 1.25%. The mortality and expense risk charge compensates AILIC for the mortality risks it assumes because of its obligation to make annuity benefit payments and death benefit payments, and for expense risks that AILIC assumes because its actual expenses in administering the Nauticus contracts and Variable Account A could exceed the amount AILIC receives through other contract fees. The rate shown is an annual rate.</p> <p>The 1983 group annuity mortality table, for blended lives (60% female/40% male) with interest at 3% per year, compounded annually, is used to compute all guaranteed settlement option factors, values, and benefits under your certificate.</p>																		
Fees	<p>A contingent deferred sales charge (CDSC) may apply on partial or full surrenders. The charge does not apply to earnings. The CDSC is calculated separately for each purchase payment. The CDSC rate depends on how many years have elapsed since the date of receipt of the purchase payment.</p> <table border="1" data-bbox="323 412 1486 477"> <thead> <tr> <th>Full years elapsed</th> <th>Less than 1 year</th> <th>1 year</th> <th>2 years</th> <th>3 years</th> <th>4 years</th> <th>5 years</th> <th>6 years</th> <th>7 years or more</th> </tr> </thead> <tbody> <tr> <td>CDSC</td> <td>7%</td> <td>6%</td> <td>5%</td> <td>4%</td> <td>3%</td> <td>2%</td> <td>1%</td> <td>0%</td> </tr> </tbody> </table> <p>An annual certificate maintenance fee of \$25 applies. It is deducted from amounts allocated to the variable investment options. A transfer fee applies to each transfer in excess of 12 in any certificate year. The current transfer fee is \$25. These charges and fees may be waived under certain circumstances. If loans are available under your certificate and you borrow money under the loan provisions, AILIC will charge interest on the loan. AILIC currently charges 6% interest on loans. AILIC will charge a higher interest rate if the plan administrator directs AILIC to do so.</p>	Full years elapsed	Less than 1 year	1 year	2 years	3 years	4 years	5 years	6 years	7 years or more	CDSC	7%	6%	5%	4%	3%	2%	1%	0%

Limitations	<p><u>Limitations on Annuity Benefit Payments.</u></p> <ul style="list-style-type: none"> If the amount of any regular payment under the form of settlement option elected would be less than \$100, an alternative form of settlement option will have to be elected. Unless AILIC agrees otherwise, the first day of a benefit payment period in which annuity payments are paid cannot be later than the certificate anniversary following your 85th birthday, or five years after the effective date of your certificate, whichever is later. Payment intervals of 1 to 4 years are available for death benefit settlement options only. <p><u>Other Contract Limitations.</u> Restrictions and limitations on purchase payments, allocations, transfers, withdrawals and active trading are summarized in Table 3.</p>
